Other: Data Structures & Algorithms (DSA), REST APIS, Git & GitHub

EDUCATION

Swami Vivekananda Institute of Science and Technology

Kolkata, India

Bachelor of Technology (BTech) In CSE

2022 – 2026

CGPA: 8.23

Higher Secondary Examination with 87.6% and Secondary Examination with 76%.

PROJECTS

Food Ordering Website🔗

MERN Stack , Stripe, Cloudinary, Tailwind CSS

Jul 2025 – Aug 2025

Developed a full-featured multi-restaurant food ordering platform enabling users to browse restaurants, view menus, add items to cart, and place secure online orders via Stripe. Implemented role-based authentication for users and restaurant admins, real-time order status updates, and Cloudinary integration for image management. Designed a fully responsive UI with React (Vite) and Tailwind CSS, and deployed the backend on Render and frontend on Netlify with a clean, modular Express.js architecture.

Real-Time Chat Application 🔗

React(vite), Express.js, MongoDB, Socket.io, Zustand, Cloudinary

May 2025 – Jun 2025

real-time chat application featuring instant messaging, live user presence, and secure authentication. Built using React (Vite), Express.js, MongoDB, Zustand, and Socket.io, it enables users to send and receive messages instantly, see online/offline status, update profiles (including avatars via Cloudinary), and search for users to chat with. The UI is fully responsive, styled with Tailwind CSS, ensuring a seamless experience across devices. Real-time communication is handled efficiently with WebSockets, while Zustand manages global auth state on the frontend.

Blog Platform with Social Features 🔗

MERN Stack

Mar 2025 – May 2025

A full-stack blogging platform built with React.js, featuring secure user authentication, Markdown post creation, real-time UI updates, post management (create, edit, delete), commenting, search/filter functionality, and responsive design for mobile and desktop.

Tech Stack: React.js, React Context API, Express.js, MongoDB, Cloudinary.
